

The *Click-to-Comply* anesthesia labeling solution simplifies the task of labeling syringe medications in the OR.

Developed by an Anesthesiologist, these labels meet all ASA, TJC and USP 797 mandates as shown in the image to the right.

The process of printing these labels takes just two clicks of a button.

If your anesthesia team is still handwriting labels during procedures, then don't wait to try out Click-to-Comply. **Give us a call!**
